

## AEP Texas Commercial Food Service Program

### Save money and energy in your commercial kitchen

The AEP Texas Commercial Food Service Program offers instant savings for qualifying high-efficiency kitchen equipment.

#### The right equipment for your kitchen at the right price

High performance energy-efficient equipment can offer savings of 10 to 70 percent over standard models, depending on the product category.\* That means for every \$1,000 in utility bills, you may currently be spending up to \$700 in unnecessary energy use.

Energy-efficient commercial food service equipment has come a long way. These models are reliable, kitchen-tested, and can help you save on monthly utility costs. With instant savings up to \$3,000 per appliance, you can choose the right equipment for your kitchen, for the best price, and without sacrificing performance.
